## Techno-Economic Research Methods

Methods are considered crucial to every scientific discipline as they **ensure rationality and verifiability of scientific findings**.

At a glance, the following figure illustrates a selection of the **key methods** within Business Economics (and, thus, of Techno-Economics and Management Science). Of course, both abstract methods and models used to reproduce complex economic realities in a simplified way are indispensable in Business Economics/ Techno-Economics/ Management Science.

This might give you a short impression of why this research seminar could be useful for your future research and teaching career.

## How to prepare Posters and Conference Papers

Date: 23. & 24.11.2021

## Goal of this Seminar

*Do you have German or another language as a native language?*

*Are you struggling to describe your research (effectively) in academic English?*

This intensive, practice-based workshop provides you with **strategies and tools** that you can use to help you to **prepare, create and revise your poster and conference paper in English** more efficiently and effectively.

We will contrast examples of weak and strong academic writing, practice transforming weak text elements into strong, compelling text, and discuss how to 'tell a story' on your poster and in your conference paper in order to **help you communicate your ideas clearly and concisely**. You are encouraged to bring your own work.

## Target Group

This workshop is designed for IEM master's and PhD students / early stage researchers who will need to prepare posters or submit conference papers that convey their ideas clearly and concisely in academic English. Students who would like to improve their skills in these areas are also encouraged to apply.
